Source Name: GREENHORN CREEK

Tributary To: SPANISH CREEK

County: Plumas

Diversion Within: SE1/4 of NE1/4 Section 22, T24N, R10E, MB&M

Year of First Use: 1897

Parcel Number:

A. Water is used under: Riparian claim _____ Pre 1914 right X _____ Other (explain): _____

B. Year of first use (Please provide if missing above) _____

C. Amount of Use - Enter the amount (or the approximate amount) of water used each month.

Amounts below are:													Total Annual
Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	
1999				X	X	X	X	X	X	X			581 ac. Ft.
2000				X	X	X	X	X	X	X			581 ac. Ft.
2001				X	X	X	X	X	X	X			581 ac. Ft.

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 80 acres; Stockwatering 30 head cattle Domestic _____;

Other (specify) _____

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES X NO _____

Describe any water conservation efforts you have initiated: We have cleaned our ditches up the water runs through faster & we are using more check dams in our ditches to get better water coverage in a shorter amount of time

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

Reductions in consumptive use:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ____ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

yr ____ (af/mg) yr ____ (af/mg) yr ____ (af/mg)
I have data to support the above surface water use reductions due to wastewater reclamation. YES ____ NO ____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ____ NO ☒
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

yr ____ (af/mg) yr ____ (af/mg) yr ____ (af/mg)
I have data to support the above surface water use reductions due to conjunctive use efforts. YES ____ NO ____

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

"Appropriation of Water in California"

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

S1497

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Dorothy Lee Jeskey Farnworth
Address Rt. 1 Box 684 Quincy, California 95971
- B. Name of body of water at point of diversion Greenhorn Creek
Tributary to Spanish Creek
- C. Place of diversion S-E 1/4 N-E 1/4 Section 22, Township 24, Range 10, MD B&M,
FLUMES County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks.
- D. Name of works Weir
- E. Capacity of diversion works approximately 12 cfs cubic feet per second
Capacity of storage reservoir gallons per minute
State quantity of water used each month in gallons or acre-feet gallons
acre-feet
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|------|------|------|------|-------|------|------|------|--------------|
| | | | | | 83ac | 83ac | 83ac | 83ac | 83ac | 83ac | | | |
- If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc. 83 acres of
pasture and hay 20 to 95 head cattle watered
- Maximum annual water use in recent years 294 ac/ft gallons
Minimum annual water use in recent years 294 ac/ft acre-feet
Type of diversion facility: gravity X, pump gallons
Method of measurement: weir acre-feet, flume gallons, electric power meter acre-feet, water meter gallons, estimate X
- F. Purpose of use (what water is being used for) Irrigation of pasture and hay and of
watering of live stock.
- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
1/2 mile west of Massack Road.
- H. Year of first use as nearly as known 1897 (land patent with water rights dates back
to 1875)
- I. Name of person filing statement Dorothy Lee Jeskey Farnworth
Position Owner Organization
Address Rt. 1 Box 684 Quincy, California 95971

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed 5/27/67

Signature Dorothy Lee Farnworth
